- Page
- Secure PDF **3**
- Text and media area
- URL

Set Up the Interactive Video

1. Add the description
2. Select content *Type*: **Create Content** or **Upload**

Build Interactive Content in the Video

- When the H5P Content window appears, select **Interactive Video**
- Upload a video file from your computer or, paste a link to a video hosted online, such as YouTube
- After uploading the video, use the **Timeline** below the video to move to the point where you want to add an interactive element
- Click **Add Interaction** to see various interactive options:
 - **Multiple Choice Questions:**
 - Choose **Multiple Choice** from the list
 - Add the question, enter answer options and mark the correct answer
 - You can enable resume video to let students continue watching after answering
 - **True/False Questions:**
 - Select **True/False**, type the question, and specify the answer
 - **Comments:**
 - Add comments or guiding text for critical points, choose **Text** to write a comment that will appear at a specific time
 - **Links and Additional Media:**
 - For extra resources, add links using Link or images and additional content using Image
 - **Customize Video Settings:**

- Video Settings: Enable options such as auto-play or allow students to skip sections
- Grading: Choose whether to grade questions and how to display results to students
- **Save and Publish the Video**
 - Once you've finished creating the interactive video and adding the desired elements, click **Save and return to course**
